Minimum Disclosure Document & General Investor Report

Investment objective

The Maestro Equity Prescient Fund will be a general equity portfolio. The Manager in selecting securities for the portfolio will seek to follow an investment policy which will secure for investors an optimum overall return, that is to say the steady growth of income and the preservation of capital in real terms. In order to achieve these main objectives the investments to be acquired for the Maestro Equity Prescient Fund, shall comprise a mix of securities, financially sound ordinary shares, stock, financially sound preference shares, debenture stock, debenture bonds and unsecured notes as defined in the Act and the Deed, all to be acquired at a fair market value.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index.
ASISA Classification: South African-Equity-General.

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 December 2022, in respect of class A was 2.31%.

Market Overview

The first half of 2023 was one of the most profitable first semesters in the past 40 years; at least if one was invested in the technology sector. Yet it doesn't feel like that, does it? Commentators have been warning of an imminent collapse for several months already; that it is only a matter of time before "reality sets in". Despite these well-meaning people, it hasn't happened. We continue to experience global equity markets climbing the proverbial wall of worry. June was no exception. A few tech shares have led a remarkable charge so far this year and continued to do so during June. As the month progressed a meaningful amount of evidence emerged to reveal a resilient US consumer and economy. It is also clear that the US inflation rate is showing a significant slowdown. We should not be surprised then, that US equity markets posted another strong month.

The MSCI World index rose 5.9% in June, bringing its year-to-date return to 14.0%. This compares favourably to the 3.5% comparable return of the MSCI Emerging market index. The latter rose "only" 3.2% in June. The US equity market rose 6.6% in June, the German market 3.1% and the Japanese market 7.5%. The latter market has been a star performer so far this year, rising 27.2%. In stark contrast the Chinese market continues to struggle; the mainland China market declined 0.1% in June, although the Hong Kong market rose 3.5%. The NASDAQ, US Mid and Small cap indices rose 6.6%, 9.0% and 8.0% respectively during June. The NASDAQ has risen 31.7% so far this year; its return over the past year is 25.0%. The Bloomberg Global Aggregate Bond index ended the month flat (+0.1%) although the dollar lost some ground, declining 1.4%. This helped certain emerging market currencies – the rand rose 4.9% against the dollar – and commodity prices ended the month with mixed returns.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Returns for periods ended 30 June 2023

Local market returns

Locally, the SA equity market struggled. As precious metal prices came under pressure, the Basic Materials index lost 8.0%. However, the firm rand supported the Financial index, which rose 11.7%. The Industrial index rose 3.7%, the net result being that the All Share index rose 1.4%. The Large, Mid and Small cap indices rose 1.1%, 4.2%, and 3.8% respectively. The firm rand also supported the SA bond market, with the All Bond index rising 4.6% in June.

Investment Manager comment

The Maestro Equity Prescient Fund rose 2.9% during June, versus the 1.4% All Share index return. Despite the Fund's large offshore exposure, which was negatively affected by the firm rand, the Fund still outperformed the All Share index. Decliners during the month included the Satrix Resource ETF, which fell 9.5%, while Storage Property fell 2.2%. Gainers were largely to be found in the financial sector; Discovery Holdings rose 10.1%, Firststrand 13.7%, Renegeren 14.6%, Afrimat 16.0%, Capitec rose 16.1%, and Standard Bank 17.2%.

Orchestrating Your Wealth

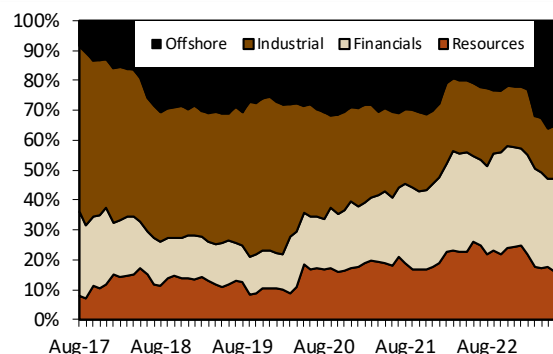

The Fund has adhered to its Policy objective during the month.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Risks

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected. Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company. Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Glossary Summary

Annualized performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualized performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 30 June 2023 the TER for Class A units were as follows:

Management Fee	2.01%
Performance Fees	0.00%
Other Cost	0.27%
Total Expense Ratio (TER)	2.28%
Transaction Costs (TC)	0.15%
Total Investment Charge (TIC)	2.43%

Minimum investment:

Lump sum: R100 000

Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
