

# MAESTRO EQUITY PRESCIENT FUND

**PRESCIENT**  
MANAGEMENT COMPANY

30 June 2019

## Minimum Disclosure Document

### Investment objective

The Maestro Equity Fund will be a general equity portfolio. The Manager in selecting securities for the portfolio will seek to follow an investment policy which will secure for investors an optimum overall return, that is to say the steady growth of income and the preservation of capital in real terms. In order to achieve these main objectives the investments to be acquired for the Maestro Equity Fund, shall comprise a mix of securities, financially sound ordinary shares, stock, financially sound preference shares, debenture stock, debenture bonds and unsecured notes as defined in the Act and the Deed, all to be acquired at a fair market value.

### The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index. ASISA Classification: South African-Equity-General.

### Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

### Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 December 2018, in respect of class A was 2.39%.

### Income declaration (annually)

3.86 cents per unit  
31 March 2019

Orchestrating Your Wealth

## Market Overview

I can report on another profitable month for global equity investors – echoes of “the pain trade” can be heard, but we have beaten that drum to death by now. June saw bond and equity markets register strong gains. Interest rates moved lower, and thus bond prices higher, on ample support from global central banks, while equity markets moved sharply higher despite the doom and gloom that prevailed during May and the uncertainty surrounding geopolitical and indeed “geo-economic” issues.

The Barclays Global Aggregate Bond index rose 2.2%, bringing its year-to-date return to 5.6%. The MSCI World index rose 6.5% while the MSCI Emerging Markets index rose 5.7%, bringing their respective year-to-date returns to 15.6% and 9.2%. The US equity market rose 7.1%, and tech shares, which saw the NASDAQ rise 7.4%. The German equity market rose 5.7% while Hong Kong rose 6.1%. Within the emerging market space, the Chinese equity market rose only 2.8% (but is still up 19.5% for the year-to-date). The Indian market actually declined 0.8%. More lucrative emerging market returns were to be found in Greece, where the equity market rose 4.6%. Turkey rose 6.5% and Russia 7.3% although this market is always a function of the oil price, which rose 3.8%.

The dollar declined 1.7% in June, setting the scene for a strong month across the commodity price complex. Leading the gains was the iron ore price, which rose 18.2% (it has now risen 83.0% during the past year). Strong gains were also posted by palladium, which rose 13.8%, the gold price rose 9.5%, and the coal price rose 9.9%. The Bloomberg Commodity index rose 2.5% during June.

“To achieve great things, two things are needed; a plan, and not quite enough time.”

- Leonard Bernstein

**Local market returns**

Turning to the local markets, not surprisingly the All Bond index posted a decent gain of 2.2%, supported by the firmer rand and the strong global bond markets. In line with global equity markets, the All Share index posted decent gains: it rose 4.8%, bringing its year-to-date gain to 12.2%. The All Share index rose 8.2% in dollar terms, bringing the year-to-date dollar gain to 14.4%. The Basic Material index rose 10.2% despite the firm rand, and the Gold index ended the month 24.5% higher. Notwithstanding the firm rand, the Financial index rose “only” 1.3% while the Industrial index gained 3.8%, bringing its year-to-date gain to 11.7%. The Large and Mid cap indices rose 5.4% and 2.5% respectively, while the Small Cap index actually declined 0.2%.

**Investment manager comment**

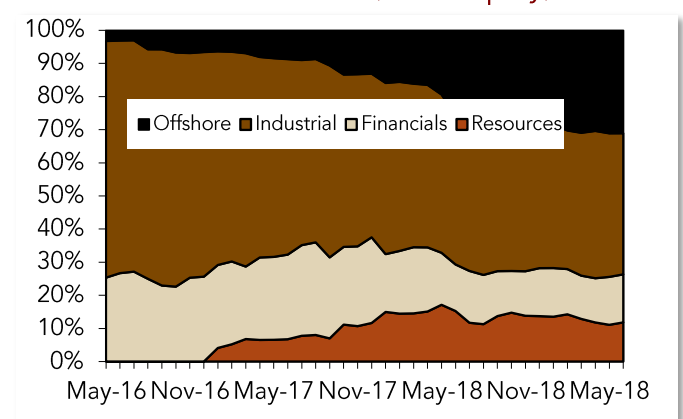

The return on the Fund was 2.6% for the month versus the 4.8% All Share index return. Shares which disappointed during the month included KAP, which lost 19.3%, Ascendis lost 6.0% and Standard Bank 1.0%. On a more positive note, Anglo plc rose 15.6%, Richemont 12.3%, BHP Group 10.1% and Glencore 5.7%.

There were no major investment transactions during the month.

### Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to [www.maestroinvestment.co.za](http://www.maestroinvestment.co.za).

### Risks

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected. Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company. Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

### Glossary Summary

**Annualised performance:** Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

**Highest & Lowest return:** The highest and lowest returns for any 1 year over the period since inception have been shown.

**NAV:** The net asset value represents the assets of a Fund less its liabilities.

### Total Expense Ratio (TER)

As at 31 December 2018 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.41%
Total Expense Ratio (TER)	2.16%
Transaction Costs (TC)	0.23%
Total Investment Charge (TIC)	2.39%

### Minimum investment:

Lump sum: R100 000

Debit order: R1 000

### Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
