MANAGEMENT COMPANY

Minimum Disclosure Document & General Investor Report

### Investment objective

The Maestro Equity Prescient Fund will be a general equity portfolio. The Manager in selecting securities for the portfolio will seek to follow an investment policy which will secure for investors an optimum overall return, that is to say the steady growth of income and the preservation of capital in real terms. In order to achieve these main objectives the investments to be acquired for the Maestro Equity Prescient Fund, shall comprise a mix of securities, financially sound ordinary shares, stock, financially sound preference shares, debenture stock, debenture bonds and unsecured notes as defined in the Act and the Deed, all to be acquired at a fair market value.

### The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index.  
ASISA Classification: South African-Equity-General.

### Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

### Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 December 2022, in respect of class A was 2.31%.

### Income declaration (annually)

79.51 cents per unit  
31 March 2023

### Fund size

R15 981 032

### NAV

Class A: 3 465.49

### Number of units in issue (A class)

377 198.48

### Fund inception date

1 July 2005

### Management Company

Prescient Management Company (RF) (Pty) Ltd  
PO Box 31142, Tokai, 7945

### Publication date

19 June 2023

## Market Overview

Global equity markets ended June slightly weaker: the MSCI World index lost 1.3% while the MSCI Emerging market index lost 1.9%. Their respective year-to-date returns are 7.6% and -0.2%; so far this year developed markets (as opposed to emerging ones) were clearly the place to be. That said, equity markets delivered mixed returns: the Japanese equity market rose 7.0% during June (its year-to-date return is now 18.4%), while the UK market declined 5.4%. The US, German, and Swiss market returns were 0.4%, -1.6% and 1.9% respectively, bringing their respective year-to-date returns to 9.6%, 12.5% and 4.6%. The Hong Kong market remained under pressure, falling 8.4%, while the Chinese equity market lost 3.6%. In contrast to the general directionless developed markets, the technology sector continued to drive market gains.

The NASDAQ index, arguably the best barometer of the tech sector, rose 5.8% during May, bringing its year-to-date gain to an astonishing 23.6%. To illustrate just how hard this sector has run, its annual return to December 2022 was -33.1% whereas its annual return to end-May was 7.1% - a dramatic turnaround by any account! The Greek equity market rose 12.3%, the Brazilian market 7.8% and the Turkish market 5.8%. The South African equity market lost 11.4% in dollar terms.

The dollar firmed 2.6% during May, putting pressure on most other currencies and commodity prices. The Brent oil price lost 8.5%, the copper price lost 5.4%, and the Baltic Dry index, a notoriously volatile index of (shipping) freight rates, lost 38.0%, having lost 61.9% during the past year. Global bond markets struggled to make headway during May, and lost 2.1%, bringing their year-to-date return to only 1.3%; remember developed equity markets are up 7.6% over the same period.

"To achieve great things, two things are needed; a plan, and not quite enough time."

31 May 2023

**Returns for periods ended 31 May 2023**

**Local market returns**

May proved to be rather unprofitable for investors. The equity market lost 3.9% while the bond market lost 4.8%. The weak rand, which tumbled 7.7% on the back of a host of own goals by the SA government, didn't help sentiment. The Basic Material, Financial, and Industrial indices lost 1.9%, 7.9%, and 3.3% respectively, while the Large, Mid and Small cap ended the month 3.5%, 7.8%, and 5.1% lower respectively. There was little place to hide for SA investors during May.

**Investment Manager comment**

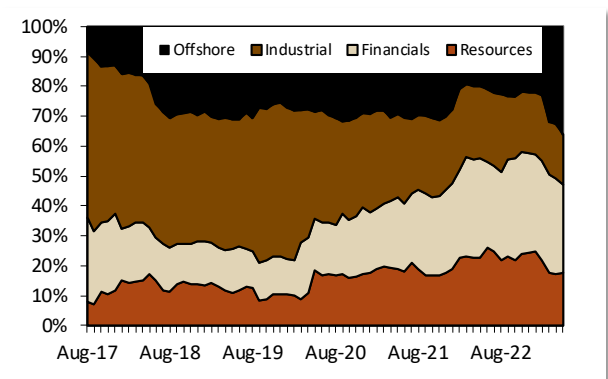

The Maestro Equity Prescient Fund rose 0.5% during May, versus the 3.9% decline in the All Share index. The Fund has always maintained a large bias in favour of offshore assets and this month, this bias stood the Fund in good stead, given the 7.7% decline in the rand. The weak rand undermined the returns of SA banks; Capitec lost 15.2%, Standard Bank 11.5% in May, and Firstrand 6.4%. Discovery lost 7.9%, and Aspen 6.2%. Thanks largely to the weak rand, Richemont rose 3.8%, the MSCI World tracker rose 5.7%, Renegen 5.8%, the CoreShares S&P500 tracker 8.3%, and the MSCI US index tracker 8.4%.

The Fund has adhered to its Policy objective during the month.

**Largest holdings**

Investment	% of Fund
Sygnia iTrix MSCI World ETF	13.9%

### Disclaimer

31 May 2023

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to [www.maestroinvestment.co.za](http://www.maestroinvestment.co.za).

### Risks

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected. Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company. Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

### Glossary Summary

**Annualized performance:** Annualised performance show longer term performance rescaled to a 1 year period. Annualized performance is the average return per year over the period. Actual annual figures are available to the investor on request.

**Highest & Lowest return:** The highest and lowest returns for any 1 year over the period since inception have been shown.

**NAV:** The net asset value represents the assets of a Fund less its liabilities.

### Total Expense Ratio (TER)

As at 31 December 2022 the TER for Class A units were as follows:

Management Fee	2.01%
Performance Fees	0.00%
Other Cost	0.19%
Total Expense Ratio (TER)	2.20%
Transaction Costs (TC)	0.11%
Total Investment Charge (TIC)	2.31%

### Minimum investment:

Lump sum: R100 000

Debit order: R1 000

### Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
