

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

31 August 2017

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 March 2017, in respect of class A was 2.2%.

Market Overview

Geopolitical tension continues to dominate headlines, with spats between US President Trump and Kim Jong-un of North Korea reaching a climax this month. Mr Trump's sensationalist comments, across various social media platforms, did little to help or calm investors' nerves. Instead, it heightened anxiety and increased division within voter groups.

The MSCI World index declined 0.1%, but the MSCI Emerging Market index rose 2.0%, bringing its year-to-date gain to 26.1% versus the MSCI World index's 11.9%. Strong monthly gains were registered in the equity markets of Russia, which rose 8.3%, Brazil 7.5%, South Africa 2.7%, Hong Kong 2.4%, and Turkey 2.3%. The firm euro – it rose another 0.8% against the dollar – retarded the returns of the German equity market. The latter index declined 0.5%, its third consecutive monthly decline. Within the commodity space, the oil price rose 1.1% on the month, while strong gains within the industrial metals complex saw nickel up a whopping 14.5%, copper rose 6.9% (on the back of a 6.8% rise last month), iron ore 4.2%, and coal 1.8%. Unlike last month, agricultural commodity prices were somewhat weaker. Corn was off 11.0%, soybeans 6.5%, and sugar fell 4.3%.

Despite the solid US growth rate, non-farm payroll data, a measure of the health of the US job market, disappointed investors. The Bloomberg Global Aggregate bond index rose 1.0% on the belief that interest rates might not be increased as much as markets had originally anticipated.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Local market returns

Turning to the South African investment markets, the combination of a fairly stable rand – it appreciated 1.5% against a weak dollar – and firm commodity prices led the Basic Materials index 5.1% higher, following its 13.3% rise last month. A strong showing by the Financial and Industrial indices of 2.1% and 2.0% respectively contributed to the 2.7% monthly gain in the All Share index. The Mid and Small cap indices rose 4.5% and 2.2% respectively. The All Bond index rose 1.0%.

Investment manager comment

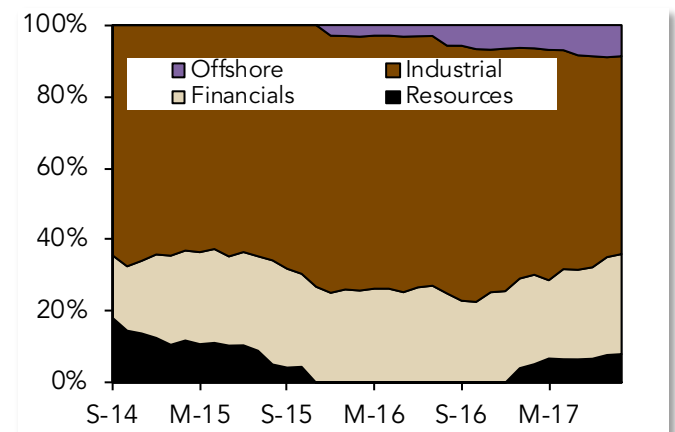

The return on the Fund was 1.2% for the month versus the 2.7% return of the All Share index. The underperformance against the broader market can partly be blamed on our sector weightings. By way of example, Basic Material shares, to which we have little exposure to, rose 5.1% during the month. What didn't help matters was the fact that one or two industrial heavyweights had strong months and we currently don't hold these shares in the Fund. For example, Imperial Holdings rose 20.0% and MTN gained 9.1% in August. The laggards in our Fund this month were Consolidated Infrastructure, which

declined 11.0%, Woolworths 5.8%, and Steinhoff International 4.8%. However, it wasn't all doom and gloom; a number of shares performed well. Star performers included Ascendis Health and Discovery, which rose 7.5% and 7.3% respectively. KAP rose 5.4% and Aspen 4.9%.

Largest holdings

Investment	% of Fund
Naspers Ltd	15.1%
Aspen Pharmacare Holdings Ltd	5.1%
Steinhoff International Holdings Ltd	4.8%
Discovery Holdings Ltd	4.6%
DB X-Trackers MSCI World Index ETF	4.4%
Firststrand Ltd	4.3%

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 31 March 2017 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.31%
Total Expense Ratio (TER)	2.06%
Transaction Costs (TC)	0.15%
Total Investment Charge (TIC)	2.21%

Minimum investment:

Lump sum: R100 000

Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
