

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

30 November 2018

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 December 2017, in respect of class A was 2.32%.

Orchestrating Your Wealth

Market Overview

We described August's market behaviour as "catastrophic" and "concerning" and October's as "brutal". With November now behind us, it feels as though November was even worse, despite what the monthly investment market returns would have you believe. Were it not for a relatively strong final week in November, returns would have looked decidedly worse.

November was characterized by a slight recovery in the Hong Kong market, which prior to November had declined 16.5% so far this year. Emerging markets also posted decent returns, and selected emerging market currencies posted a recovery of sorts. As for global equity markets, the MSCI World index rose 1.0% during November, although its year-to-date return remains negative, at -3.0%. The MSCI Emerging market index rose 4.1%, which looks good but the index is still down 14.1% for the year-to-date. Notable features last month were the Hong Kong equity market, which gained 6.1%, the Turkish market rose 5.8%, India 5.1%, Indonesia 3.9%, Brazil 2.4%, and Japan 2.0%.

The global bond market rallied towards the end of the month, ending November up 0.3%, bringing its year-to-date return to -3.2%. The dollar strengthened 0.9% and has risen 6.4% so far this year. One of the main topics of focus during the month was the oil price, which declined sharply during the month. It ended 21.5% lower on the month, but was down by more than that from its intra-month low.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Local market returns

Turning to local markets, the rand strengthened 6.4% in November, largely on the back of better global sentiment towards emerging markets. The strong move brings its year-to-date decline to “only” 10.7%. On local equity markets, the firm rand retarded much of the market strength seen elsewhere in emerging markets – the All Share index declined 3.2% as the Basic Material index’s decline of 11.5% dragged it lower. The Industrial index lost 0.7% while the firm rand lifted the Financial index into positive territory, but only just: it rose 0.5%. The year-to-date returns on the Basic Material, Financial, and Industrial indices are now 2.8%, -9.3% and -19.4% respectively, while the All Share index is 12.3% lower over the same period.

Investment manager comment

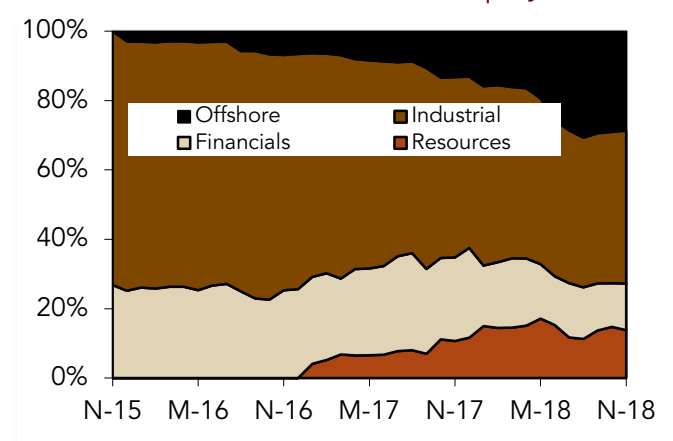

The return on the Fund was -5.2% versus the -3.2% All Share index return. Shares that detracted from the returns included Ascendis Health, which lost 50.0% after releasing uninspiring results last month. Aspen lost 5.7%, Discovery 2.6%, and AdaptIT 1.8%. On a more positive note, Firstrand rose 3.9%, KAP 5.1% and Naspers 6.6%.

There were no major investment transactions during the month.

Largest holdings

Investment	% of Fund

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Risks

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected. Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company. Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 31 December 2017 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.32%
Total Expense Ratio (TER)	2.07%
Transaction Costs (TC)	0.25%
Total Investment Charge (TIC)	2.32%

Minimum investment:

Lump sum: R100 000
Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
