

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

31 August 2016

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 March 2016, in respect of class A was 2.2%.

Market Overview

Global equity market returns were fairly muted during August as many investors opted to wait and see what global Central Bank activity would be next.

For a third month in a row the MSCI Emerging Market Index outperformed the MSCI World Index as the former rose 2.3% while the latter declined 0.1%. The US and UK markets rose 0.1% and 0.9% respectively, although Germany managed a gain of 2.5%. Hong Kong rose an impressive 5.0% and Japan 1.9% helped by a slightly weaker yen. In fact, most Asian markets were firmer with China's 3.6% gain contributing significantly to the MSCI Emerging Market's outperformance. Brazil, India, Russia and Indonesia rose 1.0%, 1.4%, 2.5% and 3.3% respectively. The dollar was marginally firmer although most emerging currencies posted decent gains – other than the rand which declined 5.9% against the dollar.

Global bonds were slightly on the back foot with the Barclays Global Aggregate index declining 0.5% but is still up 9.3% so far this year, versus the MSCI World index's comparable 3.4% gain. Commodity prices were mixed during the month as the price of precious metals fell on expectations that the US Federal Reserve could increase US rates sooner than expected. The gold, platinum and silver prices declined 2.6%, 7.8% and 6.9% respectively. The oil price rose 8.6% on rumours that major producers would limit production. Most soft commodities were weaker as the price of soybeans, corn and cotton declined 3.9%, 8.6% and 9.0% respectively.

"To achieve great things, two things are needed; a plan, and not quite enough time."

Local market returns

Turning to the South African equity market, the All Share index rose 0.3% in August, driven by the Industrial index, which gained 1.9% on the back of strength in the offshore, dual-listed companies like SABMiller and BAT. The Basic Material index lost 0.8%, the Financial index bore the brunt of the rand's weakness, losing 3.2%, and the Gold Mining index lost 16.3%, but is still 121.3% higher in 2016. The All Bond index declined 1.8% during the month.

Investment manager comment

The Fund gained 0.5% slightly outperforming the market during the month. The Fund's laggards include the Pivotal Property Fund which declined 11.1% following the announcement of a proposed deal to sell the company to Redefine Properties at a price we believe does not reflect the underlying value of the business. Mr Price declined 19.4% after releasing a very weak trading statement on the last day of the month. Other shares which declined include Woolworths which fell 9.8%, Firstrand 9.3%, Aspen 6.1%, and Standard Bank 3.9%. The list of the Fund's gainers include mostly small and mid-cap companies. Ascendis Health rose 5.1%, OneLogix

gained 6.9% after releasing some very respectable results, Afrimat 12.2% and KAP, which produced superb results during August, rose 15.6%.

Largest holdings

Investment	% of Fund
Naspers Ltd	12.1%
Steinhoff International Holdings Ltd	6.3%
Aspen Pharmacare Holdings Ltd	4.7%
EOH Holdings Ltd	4.7%
Firstrand Ltd	4.4%
Pivotal Property Fund	4.2%
Mediclinic International Ltd	3.9%
Ascendis Health Ltd	3.8%
Db X-Tracker MSCI USA Index ETF	3.8%
Old Mutual plc	3.6%
Total	51.5%

During the month the holdings in OneLogix, CalgroM3 and Balwin were slightly increased. An increase in the Fund's offshore exposure was also implemented through the MSCI US and MSCI World Db X-Trackers. The holding in EOH was slightly reduced.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period.

Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 31 March 2016 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.31%
Total Expense Ratio (TER)	2.06%
Transaction Costs (TC)	0.16%
Total Investment Charge (TIC)	2.22%

Minimum investment:

Lump sum: R100 000
Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
