Market Overview

Global equity markets maintained their strong momentum into February with most emerging and developed markets showing robust performances following a strong January.

The MSCI Emerging Market index gained 3.0% during the month bringing its 2017 return to 8.6% with strong emerging market currencies supporting the performance. Emerging markets were led by Greece, which rose 5.6%, India 3.9%, Brazil 3.1%, and China 2.6%. The MSCI World index rose 2.6% during the month with its 2017 gain at 5.0%. The US equity market lead the charge, gaining 3.9% as a number of the major US indices touched all-time highs. The German and UK markets gained 2.6% assisted by a weak euro and pound respectively.

Global bond yields continued to decline, helping the Bloomberg Barclays Global Aggregate Bond index (previously the Barclays Capital Global Aggregate Bond index) to rise 0.5%.

The DXY dollar index gained 2.1% during the month as investor expectations increased that the US Federal Reserve would hike interest rates in March. Despite the strong dollar, commodity prices continued to rise. By way of example, nickel rose 10.4%, iron ore 9.9%, palladium 7.4% and aluminium 5.2%. Precious metals were not to be outdone, with silver gaining 5.7%, platinum 5.5% and gold 3.5% (closing the month at \$1 255 per ounce).

The rand performed strongly during the month gaining 3.1%, 4.0% and 4.6% against the dollar, euro and pound respectively.

Local market returns

Turning to local markets, the All Share index (Alsi) declined 3.1% during the month. Resource shares bore the brunt of a stronger rand as they declined 9.9%. Financials rose 0.2% in February, while industrials declined 1.6%. The large cap (Top40) index declined 3.9%, while the Mid and Small cap indices fared slightly better returning -0.4% and 1.9%, respectively. The All Bond index rose 0.7%.

Investment manager comment

The Fund declined 0.5% outperforming the Alsi during the month. The underweight exposure in basic material shares assisted in the relative performance. During the month, the laggards in the Fund included AdaptIT, which produced results below expectations and posted a decline of 18.5%. The Healthcare sector remains under pressure, with Mediclinic, Ascendis Health, and Aspen returning -8.7%, -8.3%, and -8.0% respectively after releasing some disappointing trading updates. Woolworths fell 5.6% after releasing results. On a positive note, Hudaco and KAP produced superb results, with both shares rising sharply. Hudaco was up 22.7% and KAP up 20.1% over the month. Balwin released

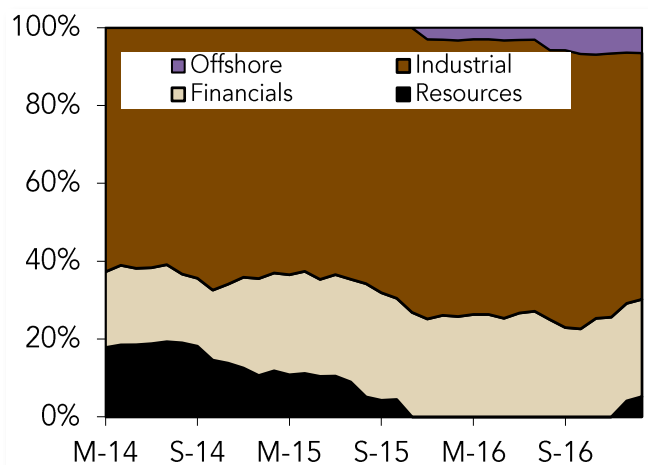

a better than expected trading update which saw its shares gain 8.1%, followed closely by Steinhoff, which gained 7.8%. The market breathed a sigh of relief when the merger between Steinhoff and Shoprite was been called off.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za
