

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

31 January
2017

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 30 September 2016, in respect of class A was 2.2%.

Market Overview

Global equity markets got off to a strong start to 2017 with most emerging and developed markets showing robust performances in January.

The MSCI Emerging Market index gained 5.5% with stronger emerging market currencies supporting the performance as the US dollar index declined 2.6%. The Turkish equity market gained 10.4% albeit on a 7.3% decline in the lira. The Brazilian market rose 7.4%, Hong Kong rose 6.2% and India 3.9%. The MSCI World index rose 2.4%, although it had been higher during the course of the month. The US equity market rose 2.0% and the German market 0.5%. The pound's strength put pressure on the UK market which declined 0.6%.

Global bond yields declined, helping the Bloomberg Barclays Global Aggregate Bond index (previously the Barclays Capital Global Aggregate Bond index) to rise 1.1%.

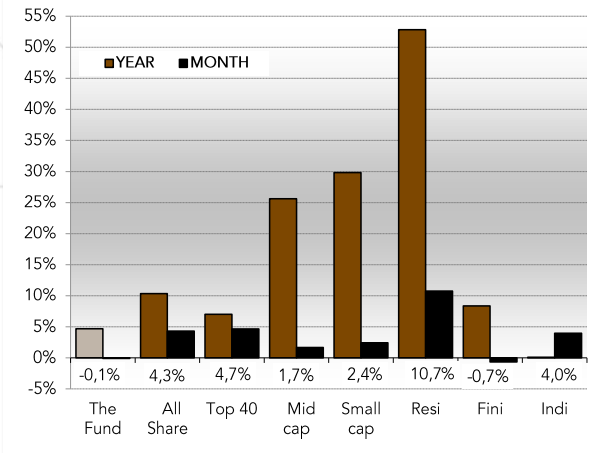

The weak dollar spurred commodity prices higher, which provided underlying strength to resource sectors in virtually all equity markets. Precious metal prices were strong with platinum, silver and gold rising 9.0%, 6.5% and 5.8% respectively. The oil price fell 0.7% during the month. Copper was particularly strong amongst the base metals, gaining 8.1% while aluminium rose 7.2% but nickel fell 1.4%. Iron ore continued its phenomenal run gaining 4.8% during the month and rising 96.8% over the past year. The Baltic Dry index, a reflection of the price of moving raw materials by sea fell 16.8% during January, however over the past year it has risen by 152.4%.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Local market returns

Turning to local markets, the All Share index (Alsi) gained 4.3% led by a surge of 10.7% in the Basic Material index. The Industrial index was also firm, rising 4.0%, while the Financials index declined 0.7% despite the firm rand. The All Bond index rose 1.3%, and the rand firmed 1.5% against the dollar. The large cap (Top40) index rose 4.7%, while the Mid and Small cap indices rose 1.7% and 2.4% respectively.

Investment manager comment

The Fund's return was flat underperforming the Alsi during the month. This is a disappointing return and start to the year but understandable due to the underweight exposure in basic material shares which surged during the month on the back of robust commodity prices. Small holdings in the major diversified miners and Mondi were introduced into the Fund during the month. The laggards in the portfolio included EOH, which declined 10.4%. Steinhoff lost 9.1%, Ascendis Health 8.5%, CalgroM3 7.8%, Firstrand 5.6%, and Standard Bank 5.2%. In contrast, Woolworths rose 4.4% during the month (despite being down over 10% intra-month

post a disappointing sales update), and Investec rose 4.4% on the back of a stronger pound. Naspers gained 6.1% and Aspen rose 8.6%. Richemont was a start performer during the month, gaining 15.7% after it released a trading update that was much better than most investors were expecting.

Largest holdings

Investment	% of Fund
Naspers Ltd	11.9%
Steinhoff International Holdings Ltd	6.0%
Aspen Pharmacare Holdings Ltd	5.5%
Firstrand Ltd	4.8%
Old Mutual plc	4.1%
Standard Bank Group Ltd	3.8%
Compagnie Financiere Richemont	3.8%
Consolidated Infrastructure Group	3.5%
DB X-Trackers MSCI USA Index ETF	3.5%
Afrimat Ltd	3.5%
Total	50.5%

During the month the holding in EOH was reduced and small new holdings in Anglo American, BHP Billiton, Glencore and Mondi were introduced.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs(TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 30 September 2016 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.31%
Total Expense Ratio (TER)	2.06%
Transaction Costs (TC)	0.15%
Total Investment Charge (TIC)	2.21%

Minimum investment:

Lump sum: R100 000

Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
