

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

30 November
2016

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 30 June 2016, in respect of class A was 2.2%.

Orchestrating Your Wealth

Market Overview

November was characterised by significant volatility in global markets as investors digested what a Donald Trump presidential victory meant for the US and the world economy. The response to Trump's victory was a dramatic rally in the dollar against all currencies, a sharp decline in bond prices, a surge in some equity sectors and a collapse in others.

Emerging markets were hardest hit as the dollar strengthened significantly. The MSCI World index rose 1.3% but the MSCI Emerging market index lost 4.7%. Specifically in the US, the S&P500 (large cap) index rose 3.6%, while the S&P Mid and Small indices rose 7.8% and 12.4% respectively. Japan's market gained 5.1% as the yen fell 8.4% against the dollar. Amongst emerging markets, the Russian and Chinese markets were the outperformers gaining 4.3% and 4.8% respectively. On the other hand the Indian, Brazilian and Turkish markets were hardest hit falling 4.6%, 4.7% and 5.8% respectively.

The dollar rose 2.9% against a basket of currencies, while the Barclays Global Aggregate Bond Index lost 4.0%. The Mexican peso lost 8.1%, the Turkish lira 10.7%, the Brazilian real 6.4% and the rand fell 3.9% against the dollar.

Despite the firm dollar, base metal prices surged on the expectation that demand for them would rise on the back of rising US spending on infrastructure. Precious metals fared poorly, with gold losing 7.4%. Copper, however, rose 19.6% and iron ore 12.8%, bringing its total gain for the past year to 71.8%. OPEC agreed to cut oil production, which resulted in the oil price rising rose 5.2% on the month.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Local market returns

Turning to local markets, the All Share index (Alsi) fell 0.6% but the decline was cushioned by strong commodity prices supporting the Basic Material index which rose 6.1%. The Financials index rose 0.3%. The Industrial index lost 3.7% and is now down 8.2% so far this year. In line with weak global bond markets, the All Bond index lost 1.8%. The Gold index lost 16.9%. The Top40 (large cap) index fell 0.6%, and the Mid cap index 2.2% but the Small cap index rose 0.5%.

Investment manager comment

The Fund declined 1.9% underperforming the Alsi during the month. In contrast to last month, the lack of resource exposure in the Fund weighed against the monthly returns. When one considers that the bulk of the investments are to be found within the industrial sector, the decline of 3.7% in the Industrial index during the month places the Fund's monthly return into perspective. Retailers were punished on the back of increasing headwinds for the consumer and poor trading results from the sector. Woolworths fell 16.9%, Steinhoff 10.6% and Mr Price 5.6%. Mediclinic lost 16.2%, Ascendis Health

lost 11.0% and Naspers 9.1%. On a more positive note, OneLogix rose 9.6%, Balwin Properties 8.6%, Standard Bank 5.6%, Richemont 4.9% and Firstrand 4.5%.

Largest holdings

Investment	% of Fund
Naspers Ltd	11.4%
Steinhoff International Holdings Ltd	6.0%
Firstrand Ltd	4.9%
Aspen Pharmacare Holdings Ltd	4.2%
Standard Bank Group Ltd	4.0%
Old Mutual plc	3.9%
EOH Holdings Ltd	3.7%
DB X-Trackers MSCI USA Index ETF	3.6%
Consolidated Infrastructure Group	3.5%
Afrimat Ltd	3.5%
Total	48.7%

During the month the holdings in Ascendis Health, OneLogix, Naspers and Sygnia were increased. A small new holding in the form of the Eastern European focussed REIT, MAS Real Estate was added to the Fund.

Historic sector allocation (% of Equity)

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 30 June 2016 the TER for Class A units were as follows:

Management Fee	1.75%
Performance Fees	0.00%
Other Cost	0.31%
Total Expense Ratio (TER)	2.06%
Transaction Costs (TC)	0.16%
Total Investment Charge (TIC)	2.22%

Minimum investment:

Lump sum: R100 000
Debit order: R1 000

Risk Profile:

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
