

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

31 August
2015

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 30 June 2015, in respect of class A was 2.06%.

Income declaration (annually)

18.63 cents per unit
31 March 2015

Market Overview

August was plagued with global investors' concerns over the "real" growth rate of the Chinese economy which is feared to be a fair bit lower than the official number. China's unexpected devaluation of the yuan and further interest rate cuts added to the nervousness. Commodity prices, already under severe pressure this year, declined further, as did emerging market currencies.

Developed equity markets coped badly; emerging markets fared even worse. The MSCI World index declined 6.8%, with the UK equity market declining 6.7%, the US 6.8%, Japan 8.2%, Germany 9.3% and Hong Kong 12.0%. The MSCI Emerging market index fared worse still, falling 9.2%, led by India, which declined 6.5%, Brazil 6.6% and China 12.5% (following July's 14.3% decline).

Commodity prices were again weak with the CRB and GSCI commodity indices declining 1.3% and 0.7% in August respectively. The gold price was the standout performer, gaining 2.9% for the month. The oil price was exceptionally volatile, plunging 15% at the start of the month, only to rise 27% during the last week of the month and then head lower by another 10% on the first day of September.

Commodity-based currencies suffered even more, with the Australian dollar, the rand, the Brazilian real and the Russian rouble declining 2.6%, 4.0%, 7.3% and 10.7% respectively against the dollar. The euro firmed against the greenback though, rising 2.6%, although sterling lost 1.5%.

Investors sought safety in global bonds resulting in the Barclays Capital Global Aggregate Bond index rising 0.1% during the month.

"To achieve great things, two things are needed; a plan, and not quite enough time."

Local market returns

Turning to South African markets, the All Share index lost "only" 3.6%, led lower by the Financial and Industrial indices, which fell 3.0% and 4.4% respectively. The Basic Material index lost 0.9% and the Gold index rose 23.6%. The JSE Mid cap index rose 0.4% while the Small cap index fell 1.3%. The Bond market performed relatively well despite a very weak rand with the All Bond index rising 0.1% in August while cash provided a return of 0.5%.

Investment manager comment

During August the Fund declined 3.4%, slightly outperforming the Alsi. Despite the Fund's bias in favour of financial and industrial shares and away from resource shares the Fund still outperformed the Alsi (financial and industrial shares posted the largest declines during August of the three major indices). Shares that led the returns lower included Glencore, down 25.4%, MTN down 16.1%, Hudaco 10.8%, Ascendis Health 10.7%, Richemont 9.9%, EOH 8.0% and Aspen 7.7%. There were a few bright spots in the market though: OneLogix rose 9.3% and AdaptIT 6.6%; both companies gained on the back of good results posted during the month. Consolidated Infrastructure Group rose 5.6% and

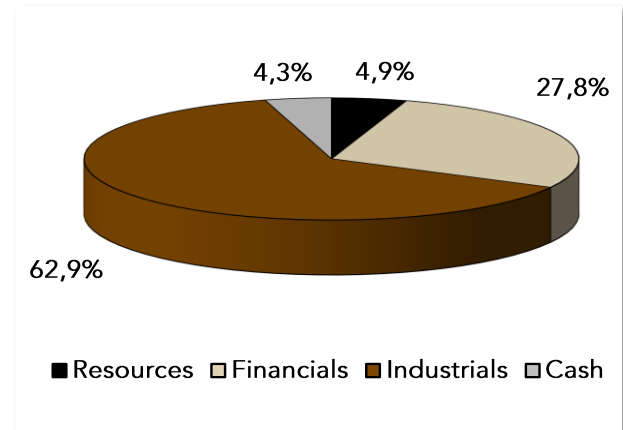

Steinhoff gained 3.8%.

Largest holdings

Investment	% of Fund
Steinhoff International Holdings Ltd	8.9%
Naspers Ltd	7.9%
Mediclinic International Ltd	5.2%
EOH Holdings Ltd	5.0%
Aspen Pharmacare Holdings Ltd	4.9%
Firststrand Ltd	4.8%
Standard Bank Group Ltd	4.2%
Mr Price Group Ltd	4.2%
Consolidated Infrastructure Group Ltd	4.1%
Woolworths Holdings Ltd	4.0%
Total	53.2%

There were a number of significant changes within the Fund during August. The holdings in MTN, Grindrod, Sasol and WBHO were sold out of the Fund. The more recently added holdings in the form of Ascendis Health and Afrimat were added to during the month as they still represent good value with attractive growth prospects. The longer held AdaptIT was also added to post their release of an excellent set of results.

Asset allocation (% of Fund)

"To achieve great things, two things are needed; a plan, and not quite enough time."

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. A Money Market portfolio is not a bank deposit account and the price is targeted at a constant value. The total return is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. The yield is calculated as a weighted average yield of each underlying instrument in the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. A Fund of Funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges and which could result in a higher fee structure for the feeder fund. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Total Expense Ratio (TER)

As at 30 June 2015 the TER was as follows:

Management Fee	1.75%
Performance Fees	0.00%
Transaction Cost	0.00%
Audit Fees	0.00%
Other Cost	0.17%
VAT	0.14%
Total TER	2.06%
