

MAESTRO EQUITY PRESCIENT FUND

PRESCIENT
MANAGEMENT COMPANY

30 June 2015

Minimum Disclosure Document

Investment objective

The Maestro Equity Prescient Fund's objective is to produce above average long-term returns by investing in the South African equity market. It will simultaneously aim to assume less risk than the risk inherent in the market itself. The Fund adopts a conservative investment philosophy. The Fund falls under the South African Equity General ASISA classification as the Fund has a high risk profile.

The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index

Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 March 2014, in respect of class A was 2.05%.

Orchestrating Your Wealth

Market Overview

Global equity and bond markets were weaker during June as the crisis in Greece, the volatility in the Chinese equity markets and speculation that the US Federal Reserve will raise interest rates in September all weighed on investor sentiment.

The level of volatility in Chinese equity markets was remarkable during June as double digit percentage trading ranges were recorded on some days in the Shanghai Composite during the month. Investors concerned with inflated valuations were the sellers while those hopeful for more government stimulus to boost markets speculated that the market would move higher which exacerbated volatility.

Taking a look at equity market performances, the MSCI World and Emerging market indices declined 2.5% and 3.2% respectively. A noteworthy stand out during the month was the 4.7% increase in the German equity market. Other development markets fared worse with the UK market falling 6.6%, Hong Kong 4.3%, the US 1.9% and Japan 1.6%. Emerging equity markets saw China decline 7.3%, Indonesia 5.9%, Russia 3.0% and India 0.2%.

Within the currency space the dollar lost a bit of ground against most currencies, falling 3.1%, 1.6% and 0.3% against the pound, euro and rand respectively. Commodity prices were generally weak despite the weaker dollar. Oil declined for the second month in a row, falling 2.9%. Gold, platinum and silver were all weak declining 1.7%, 3.3% and 5.8% respectively. Base metals and bulk commodities were also weaker on the month. Soft commodity (mainly food-related) prices, however were firm.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

Local market returns

Turning to the South African equity market, the All Share index (Alsi) ended 0.8% lower, dragged down by a 4.7% decline in the Basic materials index (the Gold index fell 8.1%) but was supported by a rise of 0.6% in the Industrial index. The Financial index declined 0.5%. The All Bond index declined 0.2%, marginally less than the 0.4% decline in the Barclays Capital Global Aggregate Bond index.

Investment manager comment

During June the Fund declined 0.6%, slightly outperforming the 0.8% decline on the Alsi. It was gratifying to deliver a reasonable return in the midst of what was a rather challenging month. The low exposure to resource shares assisted in the good relative performance for yet another month this year. Shares which lagged during the month included Grindrod, which declined 15.4% (although the holding makes up a very small portion of the Fund). Wilson Bayly's decline of 14.1% mirrored the general weakness in the construction sector (Aveng, which the Fund does not hold, declined 32.7% in June and is down 67.0% so far this year). Glencore fell 7.6%, Coronation 6.9%, Pivotal Property Fund

6.5% and AdaptIT 6.3%. On a more positive note, Woolworths rose 3.4% and Mr Price 3.7%. Discovery rose 3.8%, Sasol 5.1%, Consolidated Infrastructure Group 5.9%, Naspers 6.2% and MTN 6.3%.

Largest holdings

Investment	% of Fund
Steinhoff International Holdings Ltd	8.9%
Naspers Ltd	7.8%
Aspen Pharmacare Holdings Ltd	4.7%
EOH Holdings Ltd	4.5%
Firststrand Ltd	4.3%
Standard Bank Group Ltd	4.2%
MTN Group Ltd	4.0%
Mediclinic International Ltd	4.0%
Mr Price Group Ltd	3.9%
Sasol Ltd	3.8%
Total	50.1%

During the month the holding in SABMiller was sold out of the Fund and the holdings in Onelogix and Steinhoff were slightly reduced. The fairly recent holdings (which remain fairly small) in the form of Anchor Capital, Ascendis Health and Hudaco were added to during June.

Asset allocation (% of Fund)

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. A Money Market portfolio is not a bank deposit account and the price is targeted at a constant value. The total return is made up of interest received and any gain or loss made on any particular instrument; and in most cases the return will have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses it can have the effect of reducing the capital value of the portfolio. The yield is calculated as a weighted average yield of each underlying instrument in the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures and a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. A Fund of Funds is a portfolio that invests in portfolios of collective investment schemes, which levy their own charges, which could result in a higher fee structure for these portfolios. A Feeder Fund is a portfolio that invests in a single portfolio of a collective investment scheme which levies its own charges and which could result in a higher fee structure for the feeder fund. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third-party named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Money market Funds are priced at 1pm all other Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.maestroinvestment.co.za.

Glossary Summary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.
